

## ICONIC AWARDS: Interior Innovation 2016 – Selection Award for Day&Night sofa bed

Day&Night sofa bed is awarded with international ICONIC AWARDS: Interior Innovation 2016 – Selection Award. Award is granted by the Rat für Formgebung Medien GmbH (the German Design Council). Day&Night sofa bed is manufactured by Finnish furniture manufacturer Pedro. The award is granted for products with high level of innovation.

“Innovative top performances from every product sector in the industry are what guide the image of the ICONIC AWARDS: Interior Innovation and ensure a high level of awareness on the market.”  
The German Design Council.

Day&Night sofa bed is a part of the new Tapio Anttila Collection's interior product concept. During daytime, the sofa bed functions as a lounge sofa for example in a summer house. At night it can be transformed into two single beds or into one double bed. All the needed bedding can be found in the backrest pillows: two mattress pads, two blankets and four pillows. Therefore, no separate storage space for bedding is needed. The frame is made from solid wood (oak) and the seating mattresses are made from foam with a viscoelastic foam surface.
