

GOOD Design® Award 2015 for LINK shelf series

LINK shelf series is awarded with international GOOD Design® Award 2015. LINK is manufactured by Finnish furniture manufacturer Nurmela who received this recognition alongside the world's top premium brands. The award is the fourth GOOD Design® Award of Tapio Anttila Collection, and tenth GOOD Design® Award for designer Tapio Anttila.

GOOD Design® Award is the oldest and the most prestigious Awards Program organized worldwide, which is now celebrating its 65th year. The prize is awarded annually to the the most innovative and cutting-edge new products in different categories. Submissions to the program are judged by a jury of international design professionals, leading industry specialists and design press chosen by The Chicago Athenaeum: Museum of Architecture and Design.

"The starting point for the design of LINK shelf series was to make a simple but versatile and variable wooden shelving system. Perhaps, it is precisely these characteristics of simplicity that made LINK to stand out in this competition" says Tapio Anttila.

LINK is a convertible shelf system in which functionality meets design. The shelves are made of massive oak and oak-veneered board. They are available in the natural color or stained white or black. LINK offers a fresh perspective to storage furniture made of wood. Wood is an ecological material that brings warmth and timelessness to the home interior.
